

## NMBRS integration with DDGC

This manual explains how to setup a connection between NMBRS and De Digitale Gesprekscyclus via the API integration. The goal of this connection is to provision and synchronize user accounts from NMBRS to the DDGC account for the organisation. The synchronization is always one-way, with NMBRS in the lead. Users will never be automatically deleted within DDGC, but will be set to inactive if they have been removed or suspended in NMBRS.

# Nmbrs®

For more information on the NMBRS integration, please visit: <https://ddgc.nl/koppelingen/nmbrs>

### Prerequisites

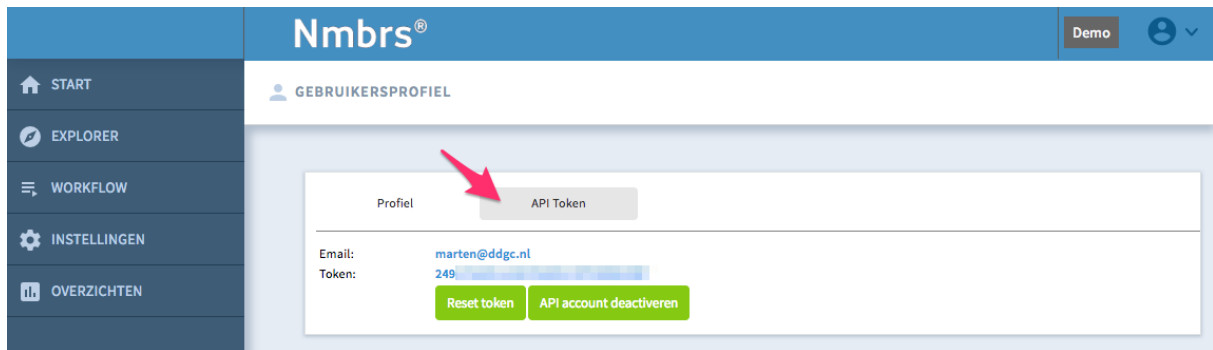

1. **A NMBRS account.** Log in as a user with administrator privileges for your NMBRS account.

### Setup

1. Log in to your NMBRS account as a user with administrator privileges ([https://\[your-account\].nmbrs.nl/](https://[your-account].nmbrs.nl/))
2. Open the "User profile" menu via the top right of your screen;

3. Select the “API token” tab;

4. Send the following information to our Support Desk at [support@ddgc.nl](mailto:support@ddgc.nl) :
  - a. Email: example-name@your-company.nl
  - b. Token: f98abcde7fdb44b1be3ae590d06c12345
5. The Support Desk will set up the API integration in the DDGC application to ensure proper synchronisation;

For more information on providing an API token, please visit:
